DENTIST, 914 SIXTH STREET,
between I and J, west side, op-
posite Congregational Church. 417

OUR YOUNG FOLKS.

A SWINGING CHAIR.
Come let us make a swinging chair—
And this is how it is.
I hold myself my own left wrist,
And hold the other in my right.
We grasp each other's right wrists now,
And make an even square—
And here we have the rockaway,
The little swinging chair.
"Here now, you Bonnie Baby Bell,
Come here and take a swing—
We'll carry you across the street,
That turn your little feet.
Just put your arms around my neck,
And one around my brother—
Oh, don't we have such jolly times
As playing with each other!"
Their mother said, when they came up—
Their three heads in a row—
"Why, that's a play I used to play
Some twenty years ago!"
"Some twenty years ago!" they cried,
"We played that game in Hyde Park."
That happened twenty years ago—
That many thousand years.

There is a saying that "the bravest are
the tenderest." It is a saying which
apply to dogs as well as men. Last
spring, in Paris, there was reported in the
papers a trial in which it was proved that
a Newfoundland dog had saved the life of
his mistress, Mme. Brunot. She had been
threatened, by a burglar, who had entered
her house in the night.
The dog flew at the burglar's throat like
an enraged lion. The man succeeded in
disengaging himself, and started down the
stairway, but Patou, the dog, followed him,
and, when he reached the street, he seized
him by the coat, and held him until help had
been summoned, when the burglar was placed
under arrest.

"As soon as the affair was over," said
Mme. Brunot, in telling the story, "Patou
went quietly and lay down under the
table as if nothing had happened—which
I don't think, somehow, was much to his
credit."
The brave dog's portrait appeared in the
illustrated papers. It showed a handsome,
good and kindly face. And now nothing
is told of the same Newfoundland which
illustrates the other side of his
character.

Madame Brunot possesses a cat, scarcely
grown up, for which Patou has an in-
tensely warm affection. One day last year
the cat suddenly disappeared. Patou
showed great concern, and even cried.
Three days passed by, and he was still in-
quiring for the cat. The fourth day Patou
also disappeared, and no news was begin-
ning to worry about his absence, when,
toward evening, he returned with little
Mimie, the cat, in his mouth. Where or
how he had found her no one knows.
Yours Complaisant.

A TERRIBLE TROPICAL SNAKE.
There are eight varieties of him (the
fer-de-lance), the most common being the
gray speckled with black, proselyte the
color that enables the monster to hide
himself among the roots of the trees by
simply coiling about them and concealing
his triangular head. Sometimes he is a
beautiful yellow, green, or may never be
distinguished from the bunch of bright
bananas among which he hangs coiled; or
he may be a dark yellow, or yellowish-
brown, or the color of wine less speckled
with dark brown, or a perfect ash, or
black with a yellow belly, or black with
a rose belly—all hues of tropical
forest, of old bark, or putrefying trees,
mold, detritus. The iris of the eye is
orange, with red flashes; at night it glows
like a lantern.

And the fer-de-lance reigns absolute
king over the mountains and the ravines;
he is lord of the forests and the solitudes
by day, and by night he extends the do-
minion over the public roads, the familiar
paths, the parks, the pleasure resorts.
People must remain at home after dark,
unless they dwell in the city itself; if they
happen to be out visiting after sunset,
only a mile from town, your friends will
warn you anxiously not to follow the
bushes as you go, and to keep as close
as possible to the very centre of the
path. Even in the brightest moon you
can not venture to enter the woods
unaccompanied; you can not trust your
eyes to detect a danger, any moment a
branch, a knot of lianas, a pink or
gray root, a clump of yellow fern, may
suddenly take life, writhe, swell, stretch,
spring, strike.

Then you will need aid indeed, and most
quickly, for within the space of a few
heart-beats the stricken flesh chills, turns
blue, softens, changes color, spots vio-
lently, and an icy coldness crawls
through all the blood. If the physician
or the passer arrives in time, and no
artery or vein has been cut directly, there
is hope; but the danger is not passed
when the life has been saved. Necrosis of
the tissues begins; the flesh corrupts, tat-
ters, tumbles from the bone; and the col-
ors of the putrefaction are frightful moun-
tains of the hues of vegetable decay, of
forest decomposition, the ghastly pinks
and grays and yellows of rotting trunks
and roots melting back into the thick feld
that gave them birth. You molder
as the trees molder; you crumble and dis-
solve as the substance of the forest
balustrade, and the palms and the acacia;
the Death-of-the-Woods has seized upon
you!

And this pestilence that walketh in dark-
ness, this destruction that wasteth at noon-
day, may yet be averted. Each female
produces viviparously from forty to sixty
young at a birth. The hounds of the crea-
ture are in many cases inaccessible, in-
explicable; its multiplication is prodigious;
it is only the surplus of its swarming that
it sends into the open sea, and the high
roads perilous after sunset, yet to
destroy three or four hundred thana-
tophobia on a single small plantation during
the lapse of twelve months has not been
unknown. The introduction of the
mangrove (the mangrove) has been
hoped, do much toward protecting the
workers in the cane fields and on the ocean
and coffee plantations; but the mangrove's
powers are limited, and the ocean of death
is limitless.—Harper's Magazine.

A Warning.
The mode of death's approach are vari-
ous, and statistics show conclusively that
the most common cause of death is the
stroke and lungs than any other. It is
probable that everyone, without exception,
receives vast numbers of tubercle germs
into the system and where these germs
fall upon suitable soil they start into life
and develop, at first slowly, and is shown
by a slight tickling sensation in the throat,
which is followed by a cough, and then
they extend to the lungs, producing con-
sumption, and to the head, causing
catarrh. Now all this is dangerous, and
if allowed to continue, it will lead to
death. At the onset you must act with promp-
titude; allowing a cold to go without atten-
tion is dangerous, and may lose your
life. It is soon felt that something is
wrong with your throat, lungs or nostrils,
obtain a bottle of Boecher's German Syrup.
It will give you immediate relief.

Where the Water Comes From.
Continued pumping at a well lowers the
ground water level in the earth for a
distance of from 100 to 1,000 feet, varying
with the geological formation and the water
supply. Hence, the greater the amount of
water taken from a well the greater dis-
tance is the water drawn through the
earth and the greater the chance for pollu-
tion.—Owens Water Report.

COMMERCIAL.

SACRAMENTO MARKET.

FRUIT—Lemons. August 24th.

OUR BREAD IN DANGER.

The United States Government Chemists, in their examinations of articles of food offered for Government use, have developed the fact that almost all the baking powders upon the market are made from alum or phosphates, or contain large quantities of lime or other adulterants. As a matter of fact, of the samples analyzed, the Royal was the only baking powder found free from all of these deleterious ingredients, and absolutely pure.

Alum is used as a substitute for cream of tartar to produce a cheap baking powder. The effect of alum upon the system has been ascertained to be poisonous, and overdoses have been attended with fatal results. The phosphate are next to the alum powders in cheapness. They contain a large amount of lime. The baking powders sold with a gift are of the alum or phosphate class.

Lime when subjected to heat gives off a certain amount of carbonic acid gas, but a quicklime is left, one of the most powerful caustics known. Chemists have found twelve per cent., or one-eighth of the weight, of some of the baking powders advertised as pure to be lime.

The absolute purity and wholesomeness of the Royal Baking Powder—now affirmed by every chemist and food analyst of prominence, and conceded by all manufacturers of other brands—arise from the exclusive use of cream of tartar which is specially refined by patent processes that totally remove the lime and all other impurities.

In his report, the United States Government Chemist says: "The Royal Baking Powder is absolutely pure, for I have so found it in many tests made for the United States Government. I will go still further and state that it is undoubtedly the purest and most reliable baking powder offered to the public."

OLD TRINITY.

A CHANCE FOR HOMES AND MONEY-MAKING.

High Prices—Fruit—Alfalfa—Rich Cheap Lands Open to Settlement—Good Climate.

(From a Well-Known Citizen of Sacramento.)

WEAVERVILLE, August 7, 1888.

RECORD-UNION: Something more than two months ago I left Sacramento in company with three other gentlemen to make the tour of Northern California, and as I observed many ideas of the country concerning which little is known in Central and Southern California, I will jot a few of them down for the benefit of the stay-at-homes. I shall confine my observations to Trinity county.

This county was a surprise to me in many ways. It is as yet but partially developed, scarcely even prospected. It has an immense wealth of timber, now lying in its virgin forests awaiting the iron horse or the V. flume to transport it to market. The entire Coast range, or Trinity mountains, is one vast belt of the finest timber in the world, with a large proportion of sugar pine, many single trees of which will furnish \$400 worth of lumber after reaching the Sacramento valley. The best bunch of timber in the county runs diagonally in a northwesterly direction from the Yolo-Bale mountains. Other good timber belts are on Good's mountain, Indian Creek mountain, and on the gravel range between Trinity county and Minnerville. The people of the county expect to realize more wealth in the future from the forests than from any other source.

WEAVERVILLE
Is one of the oldest mining camps in the State, and at the present time has more of the atmosphere of the "fall of '49 and spring of '50" about it, than any place I have visited. Everything is high-priced here, and the citizens boast of it, and they have a sigh when reminded that this state of things must come to an end in the near future. I was sitting in front of a fruit store yesterday when a miner came along and asked the price of muscat grapes, which he was informed were 20 cents a pound. Inferior peaches sell at 5 cents a pound, while at the same time you can get a good meal for yourself for 10 cents.

HOME OF THE PEAR.

The late winter apple and the Bartlett pear are at home here. I have advised the planting of more apple trees of the latest varieties to be obtained. It could be made very profitable if they would prune their trees once a year, cultivate the ground and thin out the fruit so as to leave about one-third the number on the trees, and thus have splendid, large fruit. The scale bug came to this place several years ago, and is now doing pretty well. It came on a Spitzenberg apple tree sent up here a few years ago by a well-known nursery firm in the valley and has "multiplied and increased" to an alarming extent. Nearly every available piece of ground about here that can be irrigated, is in alfalfa and it grows to perfection. Weaverville is a feeder for a large number of

MINING DISTRICTS.

A few of which I will mention of. First comes the Deadwood District (quartz), situated eleven miles east of here. It is one of the most celebrated mining camps in the State. The principal mines at this place are the Brown Bear, Niagara, McDonald, and various other small mines. The Brown Bear is owned in part (one third) by our former townsman, Charles Watt, and one-third each by Henry Martin of Weaverville and an estate of a deceased person. This is a valuable property and I understand its owners very properly refused an offer of \$300,000 for it. The Niagara is owned by San Francisco capitalists, and is very profitable. The McDonald mine is owned by the McDonald Brothers and Franks. They run a five-stamp mill last year and divided \$120,000 as the result. They have recently put up a ten-stamp mill and expect to double their dividends next time. Next comes the

NORTH FORK QUARTZ DISTRICT.

Situated twelve miles north of west from Weaverville. This is a new district, and a very large one. As there are no mills in the district, the ore has all been worked by arrastra for the last two years. The

principal mines of the camp are the Yellowstone, Enterprise, Golden Chest, North Star, Ozark and others, together with about fifty others in course of development, the latter worked mostly by men of small means, and is a splendid opportunity for capital that is seeking investment. The Enterprise is owned by Balch, Loddell and others, of Weaverville, and is worked by an arrastra. They have a few thousand feet of vein, and have worked no quartz that has not paid \$100 per ton. There is no quartz in this district that does not pay handsomely.

NEW RIVER QUARTZ DISTRICT.

Is thirty miles northwest of Weaverville. There are several five stamp mills at this camp, all of which were packed in on the backs of mules. There will be a wagon road graded to this camp in a short time, and expectation runs high regarding its future. Its principal mines are the Ridgeway, Colgrove's, Hard Tack, Tough Nut and Mountain Boomer. The Ridgeway is owned by George Denn and others, two-thirds interest in which was recently sold for \$150,000. The Hard Tack, Tough Nut and Mountain Boomer belong to Messrs. Ladd and Clements, of New River, two old practical miners of the district. The leads are all very rich.

THE BULLYHOOP DISTRICT (QUARTZ).

Is fifteen miles southeast of Weaverville. The principal mines of this district are not so rich as in many others, but they are overhauled by competitors in the immense size of the veins. There is one ten-stamp mill, two five-stamp mills, and one Huntington, and one Cannon-ball mill. All the mills find profitable work. The only drawback for a poor man is that the "country" rock is so hard, that it requires a larger capital to work them. There are many other localities in Trinity where they have good prospects, and their development is only a question of time.

CINQUEAR DISTRICT (QUICKSILVER).

Is about thirty miles from Trinity and about twenty miles from Weaverville. The principal mines are the principal mines, and have generally been profitably worked. The Alturas has shut down on account of litigation. The cost of producing quicksilver in this district is seventeen cents per pound.

PLACER MINES.

The Ward, two miles west of here, is the largest placer mine in the county. It is owned by P. M. Paulsen and others, of this place. The only drawback is the lack of water during a great portion of the year. The mine has always paid \$500 a year, and is now being worked. It owners have recently negotiated for additional water rights, and when the contemplated improvements are completed it will probably be the best paying property in the State.

THE HAYS MINE (PLACER).

Is at Junction City, six miles west of Weaverville. This is a very extensive mine. Water was brought from Canyon creek, a distance of several miles, at an expense of about \$100,000. It earned its owners \$300,000 last year. Junction City is the largest placer mining district in the county. The Evans & Bartlett, Mammoth and Jacobs mines are all very extensive, and are considered amongst the best in the county. The McMurray & Hupp mine is located at Weaverville, and is one of the most extensive in the county. It has a good water supply, has been worked continuously since about 1860, and has always paid its owners handsomely.

A MINED-OVER TOWN.

The entire town of Weaverville has been mined over, and its streets to-day are literally paved with gold. There is scarcely a pan of dirt on the public highway that does not contain the precious metal. Its people are whole-souled, big-hearted, generous and genial, and grasp your hand with a warmth and cordiality that places you at ease at once. Your readers will readily perceive from the foregoing why hay and barley are three cents per pound, and grapes twenty cents, and other things in proportion. This part of the country is wholly dependent upon and draws its supplies from the agricultural districts, and this brings me to the beautiful valley of

HAY FORK.

Twenty-eight miles from here, at the end of the new graded road from Red Bluff. It contains about 30,000 acres of good land, with sufficient streams of water to irrigate every acre of it at comparatively little cost. Talk about alfalfa!—why, Hay Fork valley would put the bluish on any lands adjacent to the Sacramento valley for alfalfa, and they have the whole of the mining districts for a market. Just think of it—they come to your stacks and take the hay away themselves, and pay you more for it than either the Sacramento or San Francisco markets will pay. Then, if you have a grain of enterprise, you will buy a lot of calves and young

stock cattle and let them roam over the hills in the country, and in the winter, and feed them about two months in the winter, and you have fat beef and get the top prices, while your silurian neighbor has to wait till his are again fattened, and the price has dropped in the mean time two or three cents per pound. One of the greatest needs of the valley at the present time is for a few

PEOPLE OF ENERGY AND MONEY.

To come in and do things as they are done in other prosperous communities, and they will make fortunes for themselves, and put new life into the community. Many of the people have been living on and improving their lands for several years with out even so much as making a filing, either through ignorance or to avoid the Tax Collector. Several people have lost part of their alfalfa fields, some wheat fields, and others their orchards, through neglect. There is good Government land left in the valley, open to any one who will come soon and take it. Procrastination, however, will not do. I sent to Weaverville for a surveyor and land attorney when I first came over, to do about half a day's work, and they kept him in the valley over a week, and he then left, leaving a large number to await his next coming. Several thousand acres of the best land has been pre-empted in the last three weeks, simply because somebody else thought it was worth something. An old resident (Mr. Knowles) sold his farm of 320 acres, with good buildings, several miles of fencing, and a splendid apple orchard, for \$7,000. The man that bought it can double his money in twelve months. Such a place in the Sacramento valley is worth \$30,000. Hay Fork is rapidly gaining in population, and inside of five years will have the county seat, for the simple reason that she will outgrow the other places. It is the most centrally-located place in the county. The views in all directions are simply

BEAUTIFULLY GRAND.

I am building a house at the brow of a hill, and just across the valley I shall have a wealth of views. There is a gentle slope for half a mile in front, when the river is reached. Persons visiting this country five years hence will not recognize it from their present recollections of it. We have selected a beautiful spot on a low hill for the Court-house, after it shall have been put on wheels. The building occupied at present by the county is an old store, probably an early pioneer. I will state concerning connection with vacant lands, that there is considerable water in Scott's valley, and Siskiyou county. It is good land, and most of it can be irrigated. The winters are a little severe, but it is a good country to make a home in, with good wheat or alfalfa lands. There are many elegant residences in the valley, that I should say cost from \$5,000 to \$10,000. Finally, if this should reach the eye of any industrious couple of small means and willing hands, that want to reach independence in a few years, I advise them to come up north. The lands are incomparably better than those in the south, and you will not have to cover it with twenty-dollar pieces to own a few acres of God's footstool. Good, delicious pure water, and plenty of it, and a fine bracing atmosphere. Leave your pills and noxious drugs behind you. There is not a physician in all of Hay Fork valley—none nearer than 28 miles, and he has never been called except to set a broken bone. I fear I have drawn this epistle to a greater length than I should have done, but I have been so charmed with the country that I could not say less.

J. T. G.

MARRIED.

Florida, August 20—By Rev. W. A. Johns. Stewart and Perkins to Minnie C. Schultz.

BORN.

Sacramento, August 20—Wife of Edwin D. Holmes, a son. (San Francisco papers please copy.)

Sacramento, August 20—Wife of George M. Manus, a son.

DIED.

Sacramento, August 23—Emma Z. wife of T. W. Messure, a native of California, 24 years.

Friends and acquaintances are respectfully invited to attend the funeral services, to be held at her late residence, No. 1113 J street, between Eleventh and Twelfth, Sunday, August 26th, at 2 p. m. Remains will be shipped on the 11:30 a. m. train to Merced for interment.

Sacramento, August 24—Elizabeth, wife of J. McJannet, a native of Glasgow, Scotland, 75 years and 2 months. (Wainwright and Providence, Rhode Island, papers please copy.)

Remains will be shipped to South Vallejo to-day, at 7 a. m., for interment.

Sacramento, August 25—Thomas Edward Dolan, son of Mrs. E. J. Dolan and the late Captain R. J. Dolan, 31 years, 4 months and 12 days. (San Francisco and Boston papers please copy.)

Friends and acquaintances are respectfully invited to attend the funeral, which will take place Sunday afternoon, at 2:30 o'clock, from No. 530 N street.

Sacramento, August 25—William E. Brown, a native of Iowa, 25 years, 10 months and 19 days.

Friends and acquaintances are respectfully invited to attend the funeral, from her late residence, Twenty-fourth and I streets, this morning at 10 o'clock.

Sacramento, August 26—Youngest daughter of A. and Mary Johnson, of Nicolaus, a native of California, 1 month and 12 days.

Friends and acquaintances are respectfully invited to attend the funeral, which will take place from the parlors of Fritz & Miller, Odd Fellows' Temple, Ninth and K streets, this afternoon at 2:30 o'clock.

Sacramento, August 26—William E. Brown, a native of Iowa, 25 years, 10 months and 19 days.

Friends and acquaintances are respectfully invited to attend the funeral, from her late residence, Twenty-fourth and I streets, this morning at 10 o'clock.

Sacramento, August 26—Youngest daughter of A. and Mary Johnson, of Nicolaus, a native of California, 1 month and 12 days.

Friends and acquaintances are respectfully invited to attend the funeral, which will take place from the parlors of Fritz & Miller, Odd Fellows' Temple, Ninth and K streets, this afternoon at 2:30 o'clock.

CHRISTIAN SCIENCE. FREE LECTURE BY MR. J. P. FILBERT, F. C. S. B., Graduate of the Massachusetts Metaphysical College, Boston, at Y. M. I. Hall, Seventh and K streets, SUNDAY, August 26th, at 3 p. m. Come and learn that TRUE Christian Science is a pre-eminently Christian and scientific, and bear the truth as Jesus the Christ taught and practiced. No contribution.

IN MEMORIAM. AT A MEETING OF THE DIRECTORS OF THE Germania Building and Loan Association of the city of Sacramento, held on Wednesday evening, August 22nd, 1888, the undersigned were appointed a committee to prepare suitable resolutions in memory of our fellow member, the Board of Directors, Mr. CHARLES HEINRICH. In accordance with the appointment we have most respectfully submitted the following:

WHEREAS, It has pleased the hand of Providence to call away from our midst our beloved friend and fellow Director, CHARLES HEINRICH, to yonder land, from whence no traveler ever returneth, therefore, be it Resolved, That in the departure of our beloved and highly esteemed friend, we could ill spare, from our number, one of our most faithful and active workers, who was at all times ready to promote the prosperity of our association to the best of his ability, and our city one of her oldest residents, who stood by her through fire and flood, and who never lost faith in her future and prosperity. Resolved, That we extend to the bereaved family of our departed friend and fellow Director our sincere sympathy. May they rest assured that his memory will forever be dear to us, and that his integrity and zealous efforts for the welfare of our association shall never be forgotten.

Resolved, That a copy of these resolutions be spread upon the records of the Germania Building and Loan Association, that a copy be forwarded to the family of our deceased friend and fellow Director, and that they be published in the papers of this city.

CHARLES SCHMITT, JEROME HAIN, GEORGE SCHURM, Committee.
